

Embiro Labs fact sheet

Current as of 8 October 2026

At a glance

Name: Embiro Labs

Parent brand: Embiro

Stage: Early-access waitlist and demand validation. The AI platform is planned, not live.

Initial audience: Developers and product teams in Uganda and East Africa.

Proposed offer: AI workspace for teams and open-model inference API for developers.

Primary message: AI, closer to home.

Planned commitments and open decisions

African processing and storage are a planned service commitment. Lower latency is a goal; no comparative benchmark has been published. Hardware investment, specific hosting locations, launch date, pricing, final model lineup, retention and training policies, API compatibility and production service terms remain unconfirmed. No payment is collected through the waitlist.

Candidate catalogue

19 candidates span text, vision, embeddings, reranking, speech transcription and image generation. GLM 5.3, Qwen, Mistral and Gemma feature on the site. All candidates remain subject to evaluation; none is hosted by Embiro Labs today. Publisher names identify third-party models and do not imply endorsement.

Public resources

Website and waitlist: <https://embiro.ai>

Parent website: <https://embiro.com>

Media and general contact: hello@embiro.com

Brand: Mineral Workshop; forest, mint, ivory and persimmon; Manrope and JetBrains Mono.

Assets: 7 original concept illustrations, outlined logos, editable social templates, brand guide and press copy.

Reporting guidance

Describe the service as planned and the waitlist as open. Do not describe candidate models, integrations or African compute capacity as live. The public waitlist's storage and privacy terms are separate from the proposed inference service. Artwork is conceptual and does not establish facilities, hosting cities, certifications or partnerships.
